

FOUNTAIN ADDITIVES

Foam Aid:

Controls foaming in circulator tanks.

Fungus Arrest: Stops and prevents fungus, algae, and mold build up throughout the circulator unit.

Ink Drying Additive: Speeds ink setting and drying for quick turn around.

Non-Piling Additive: Helps to lubricate blankets resulting in fewer blanket washings and less picking and paper piling.

Printers Alcohol:

99% Isopropyl Alcohol.

Pure Gum Arabic: A high quality gum to be used in plate storage or added to fountain solution for extra desensitizing.

PLATE CLEANERS

Aqua Plate C/P: A multi-purpose plate cleaner and preserver. Effectively cleans while leaving behind a protective film to help preserve the plate.

Clean N Store: An asphaltum gum etch product for use in storing plates.

Hit'n Run: Plate cleaner and conditioner for metal plates. An excellent product that combines the best features of solvent cleaning action, and gum protection for the non-image areas.

On The Spot: Fast acting liquid plate cleaner. Very strong alkaline based cleaner to remove heavy oxidation, and helps stored plates to roll up clean.

Scratch Remover: Effectively and efficiently cleans and removes scratches from metal plates.
